data handling continued

- Extended Direct-Access Method program set for transparent data set management 2−35090
- fast decyption algorithm for the knapsack cipher 2−35069
- FBR fuel optimisation using data bank system BESEX 2−36119
- font data reordering technique 2−39300
- FORTRAN bit processing 2−23182
- FORTRAN DML, CODASYL, extension parsing 2−23175
- FORTRAN standard data handling 2−23191
- FORTRAN subroutine library for common processing *(Japanese)* 2−35326
- FPAL numerical programmable formatting, is PL/M 2−39297
- geodesy data, Helmert blocking, top-down strategy 2−24095
- geodetic requirements for DBMS 2−23905
- geographic database compaction technique analysis 2−27424
- geographical data organisation with quad trees and least squares approx. 2−39560
- geothermal flashing plant, microcomputer-based data acquisition and processing system 2−28172
- graphic interactive computer systems for geodetic data and mapping 2−23913
- graphics program adaptation for machine design to graphic data display *(Russian)* 2−28336
- graphics segmentation software 2−31093
- hashing function, minimal perfect, letter oriented 2−43132
- hiragana strings appearing in Japanese sentences, automatic segmentation *(Japanese)* 2−35103
- HP-83 graphics package 2−24719
- hybrid automatic-repeat-request scheme with parity retransmission for error correction 2−23090
- hybrid clustering procedure for concentric and chain-like clusters 2−35095
- hybrid Go-back-N automatic-repeat-request with extended code block 2−23093
- hybrid selective-repeat automatic-repeat-request with finite buffer 2−23091
- iAPX 432, addressing techniques, instruction set, compact code 2−35065
- image data, high speed capture method 2−28267
- image processing systems, data management techniques *(Italian)* 2−35057
- indexed data compacting 2−27431
- informatics and education 2−35675
- input data streams in data monitoring and processing subsystems, statistical investigation and probability characteristics *(Russian)* 2−25003
- instruction execution conditioned on operand addresses 2−35076
- inter program data flow *(German)* 2−35068
- Japanese Kana to Kanji translation, characteristics for input operation using the IDIOM method *(Japanese)* 2−31076
- Japanese Kana to Kanji translation algorithm by IDIOM method *(Japanese)* 2−31077
- Japanese Kana to Kanji translation dictionary on IDIOM method, composition *(Japanese)* 2−31078
- Japanese Kana to Kanji translation method using characteristic Kanji marks *(Japanese)* 2−31075
- keyboard repeat program for TRS-80 2−27549
- laboratory computer language selection 2−35060
- level sensitive scan design scan string loading with minimum hardware 2−27043
- Linda DBMS data manipulation *(Russian)* 2−39510
- line length on PET screen 2−28497
- line segment generation, symmetric linear algorithm 2−27421
- magnetic aids to teaching file processing 2−24751
- magnetic tape multivolume data compression 2−26878
- maintaining order of network events 2−27437
- Melbourne scanning proton microprobe developments 2−38090
- menu manager, general purpose software component 2−35085
- MERA 400 program package for disc file processing *(Polish)* 2−23069
- metrological data preparation for processing using combined job sheet of instrument 2−36055
- metrological data presentation in alphanumeric form 2−36054
- microanalysis using charged particle accelerators, control and data handling system 2−38091
- microprogram-driven CPU, saving bits in control store word 2−35094
- mixed left-right, right-left display 2−39089
- multi-CPU computing system, data set usage sequence number 2−23096
- multiple data transfer request 2−39304
- multiple level branch and link control input/output controller 2−27436
- multiprocessor system hardware based on MC68000 microprocessor 2−26367
- operator prompting for hyphenation 2−31081
- optimized error correction/detection for chips organized other than BY-1 2−38772
- optional, repeatable, and varying type parameters 2−23107
- OSI computers string search and change utility in machine code 2−44199
- output formatting 2−39321
- parallel processor, non-numerical methods 2−39293
- parameter passing in programming languages 2−23181
- part string search technique *(German)* 2−39289
- partial-line-feed printing 2−31576
- password extension for improved human factors 2−32327
- pattern controller for data transfer from disc to large capacity memory 2−38933
- pattern matching system 2−39318
- pattern-matching with the 6502 on the Apple 2−44195
- PET screen editing facilities 2−32070
- polyphase micro-instructions, bit steering 2−38515
- preservation of initial and dynamic byte counts for interruptable decimal instructions 2−27441
- preventive error control scheme 2−23092
- primary meas. data recording format 2−36053
- process control, optimal level of database redundancy in automatic system *(Russian)* 2−36052
- processor-to-processor communication links, dynamically assignable 2−23215
- program operation sequences verification using data flow anal. 2−26617
- programmable control for display/alter of registers scattered in scan rings 2−26763
- public-key crypto system for distrib. of Data Encryption Standard keys 2−31082
- queueing systems, evaluation of confidence intervals in statistical simulation *(Russian)* 2−31085
- Real-Time Superviser data transfer facilities 2−27592

data handling continued

- register manipulation in T159 *(German)* 2−39288
- relational DBMS, magnetic bubble memory structures appl. 2−23327
- right of access and confidentiality *(French)* 2−23099
- scanning PIXE meas. with Eindhoven cyclotron, data handling 2−38093
- screen management utility for the IBM 3270 display station 2−35107
- screen scrolling 2−35086
- search time reduction methods 2−23081
- self-describing data file structure for large data sets 2−35056
- shift and round decimal instruction 2−27439
- simultaneous disc storage and retrieval, for Space Shuttle prelaunch checkout and control 2−27455
- slow array bits, recovery from errors 2−35093
- SOSYNAUT software system fixed data extension and modification using DAS Data Amendment System 2−29748
- source-independent explicit routing tables, dynamic creation and deletion 2−27446
- source-independent explicit routing tables, failure processing 2−27447
- spatial data structure, consistent operations, geographic database appl. 2−39558
- stack sequence generation 2−39311
- stack structure for the TMS 9900 *(Italian)* 2−23089
- statistical data anal., kinematic displays use to represent high dimensional data 2−39329
- STI handling and coding *(Russian)* 2−35658
- storage I/O capacity planning for IBM 3350 2−31101
- storage synchronization mechanism 2−39303
- string comparator, hardware hashing 2−42601
- string handling in BASIC 2−24625
- string handling in C language 2−43100
- surface representation 2−23105
- SWALLOW: a distributed data storage system for a local network 2−23111
- test I/O instruction modification 2−27435
- text compression, binary coded text 2−27418
- text compression using variable- to fixed-length encodings 2−27452
- text visualisation for the partially sighted 2−31054
- text/data entry, variable character position audible operator feedback 2−39299
- time division switching networks evaluation, plurality of speeds 2−27467
- Timing Analysis Results Analysis program, graphics data handling 2−35092
- virtual storage system, code sharing by functions having different addressing requirements 2−39264
- VISICALC for tabular presentation of information *(German)* 2−36256
- weakly synchronous code for restricted channels 2−35078
- word puzzles unscrambling in BASIC 2−23101
- Z-charting for businessman and programmer 2−23103

data loggers

- computerised control aspects 2−30131
- control room data logger, Mauell ME2005 2−37413
- controller backup/data logger 2−34873
- electrostatic precipitators, control and monitoring 2−21620
- graphite, irradiation-induced creep testing, computer-supervised data logger 2−26357
- marine diesel engine test rig, data collection and processing *(German)* 2−30136
- microprocessor based data loggers and recorders 2−33370
- modular memory subsystems, geophys. instrumentation package 2−39061
- multichannel analog recorders, digital AGC for seismic signals 2−26380
- Orion data logger, logging definition approach 2−33368
- patient monitoring, microcomputer based system, research oriented, data logging 2−35824
- recorders and loggers, advances and innovations 2−37412
- remote data acquisition and logging 2−41569
- solid state memories, remote data recording applications 2−41570
- universal data logging and process control system *(German)* 2−37419

data preparation

- *see also word processing*

satisfaction process: computational aspects of extended filters 2—24974
segmentation by shape discrimination using spatial filtering techniques 2—36940
seismic detection of personnel, adaptive and learning algorithms 2—20728
sensor placement in optimal filtering and smoothing problems 2—20780
separation theorems for optimal stopping and impulse control 2—29455
signal estimation using inverse scattering techniques 2—20818
signal shape optimisation with series filtering, game-theory estimation 2—36567
singular perturbation, state aggregation and nonlinear filtering 2—20831
singular value decomposition and improved frequency estimation using linear prediction 2—36972
singular value decomposition and spectral analysis 2—20819
sinusoidal signal retrieval in coloured noise, unbiased adaptive method 2—20836
sliding discrete Fourier transform and Hadamard transform ccts., synthesis 2—25274
smoothing estimation of stochastic processes, two-filter formulas 2—25255
smoothing methods, exponential, appl. for predicting time series from small samples *(Russian)* 2—20790
smoothing problem and variations, data analytic approach 2—25305
SNR enhancement of narrowband signals in coloured noise using adaptive predictions 2—20821
Spanish vowels, analysis and synthesis method for linear prediction *(Spanish)* 2—25268
state estimation using unreliable sensors 2—29175
state estimation with partially noise corrupted measurements, duality principle 2—20670
stationary filtering problem in the frequency domain, solution 2—20842
stochastic control and filtering, integration methods in function space 2—21312
stochastic control by functional analysis methods, book 2—37345
stochastic control strategies with incomplete information 2—33238
stochastic filtering in manifolds 2—41090
stochastic Lyapunov methods and appl. *(Hungarian)* 2—21174
stochastic optimisation in Hilbert space, performance measure 2—25104
suboptimal nonlinear filters for systems with random structure 2—25300
suboptimal reduced order filter synthesis for digital linear dynamic systems 2—32965
texture analysis based on filtering properties of the human visual system 2—20758
textures, two-dimensional time series 2—36939
tibral family synthesis by warped linear prediciton 2—24518
truncated second-order nonlinear filter derivation 2—20783
tunable filters and correctors, design using accuracy characts. 2—20805
two-dimensional rational power density spectra, additive/multiplicative min. phase decompositions 2—25261
unit-train control, hybrid models for state estimation 2—21863
wave propagation problems, functional integrals appl. 2—20829

filters

Interactive Design Language: a unified approach to hardware simulation, synthesis and documentation 2−43195
interactive man-machine dialogues, description implementation and monitoring 2−31152
ISO, TC97/SC5 report *(Dutch)* 2−23158
Japanese computer science and technology review 1982, book 2−38658
job-oriented languages appl. in architectural CAD *(German)* 2−36083
Josef, introductory programming language 2−35142
laboratory computer language selection 2−35060

high level languages continued
- laboratory data acquisition, software selection 2—31919
- language design objectives and the CHANGE system 2—43160
- languages, link indicators for cohesion indication, syntactic and logico-semantic properties 2—27915
- LAP circuit layout language, hybrid IC design appl. 2—35919
- LAVA target language for silicon compilers 2—28254
- LISP, direct execution on list-directed architecture 2—39333
- local information station command language 2—39807
- Logical Machine automatic software 2—22999
- Logo, microcomputer language 2—27493
- Logo—a cultural glossary 2—39331
- Logo advantages for development of problem solving skills 2—40400
- Logo beginner's guide 2—39330
- Logo for the Apple II, the TI-99/4A, and the TRS-80 Color Computer 2—39332
- Logo in the Schools 2—40398
- LOGO interactive language for schoolchildren 2—32018
- Logo teaching for children 2—36353
- Logo teaching language and educational philosophy 2—40415
- Lorel-2 executor structure, improvement by firmware *(Japanese)* 2—35145
- machine-independent linker 2—27598
- macro facilities and processors, book 2—23220
- man machine dialogue languages *(Croatian)* 2—23156
- man-machine language for DX digital switching system family 2—37963
- manipulation environment, interactive system for modelling and monitoring 2—36051
- manipulator for severely disabled, fast interactive control 2—42183
- MARBLE, virtual machine resource binding language for HLL 2—23192
- Martlet, language based on Ada and Pascal 2—23166
- MCODE, comparison with PDP-11 and VAX instruction sets 2—35122
- MEFIA, axiomatic definition and properties *(French)* 2—23174
- menu creation and interpretation system, description 2—23030
- Mesa instruction set, anal. using dynamic instruction frequencies 2—39335
- Mesa instruction set, empirical anal. 2—39385
- Mesa language 2—23135
- Meta language, ML1 *(Italian)* 2—43184
- Meta language system for bitslice appls. 2—27505
- Micro Expert, advice language for expert systems 2—35126
- microcomputer language selection 2—43167
- microcomputer languages, review 2—35128
- microcomputer programs editing *(German)* 2—30977
- microcomputing in computer centres *(Russian)* 2—39725
- microprocessor development systems history and general theory *(Norwegian)* 2—38625
- minicomputer-based general-purpose database, design and implementation 2—23347
- MML, CCITT man-machine language 2—31111
- MML, CCITT man-machine language for SPC switching systems 2—40233
- models of local environment for cooperating processes: communication and synchronisation *(Italian)* 2—39364
- Modula 2 review 2—43178
- Modula-2, component control 2—35178
- Modula-2— a solution to Pascal's problems 2—43180
- Modula-2 language in implementation of virtual terminal model 2—43158
- MPDL, description language for concurrent systems 2—22453
- multiprocessor systems, Architecture Description Language 2—22470
- multitask program development and synchronisation *(Hungarian)* 2—39455
- MUMPS description and advantages 2—23171
- musical subroutines need 2—28470
- natural language communication between user and computer 2—43166
- natural language interfaces, design and implementation 2—23194
- natural language interfaces to data bases: a day-dream or a realistic goal? 2—39520
- natural language processors eval. 2—31144
- NATURAL structured programming development system 2—32367
- natural-language programming: styles, strategies, and contrasts 2—39336
- nonprocedural and data flow languages 2—43173
- nonprocedural computer language, teaching in business schools 2—24785
- nonproceduralness of programming languages 2—31129
- NSC Tiny BASIC for INS8073 2—27479
- OS command languages for programmable text editor 2—23178
- PANDA—a database query language for ordinary people 2—39355
- parallel processors, high-level languages 2—39343
- parameter passing in programming languages 2—23181
- Pascal and C, comparison 2—35170
- PASTOR, schedule programming language 2—43144
- PEARL 300, process control appls. 2—39371
- PEARL for real-time and process control programming *(German)* 2—23118
- PEARL real time computer language, appls. *(German)* 2—23151
- PI (placement and interconnect) system for NMOS and CMOS circuits 2—43931
- Picture Processing Language for PICAP system 2—35156
- Pidgin for the 8080 under CP/M 2—28491
- PILOT for CAL 2—28415
- PILOT language for CAI 2—44156
- PL/M, for microcomputer programming *(German)* 2—23152
- PLAIN: an algorithmic language for interactive information systems 2—39377
- Platon use for communication by message passing or procedure calls in multiprogramming 2—23274
- POL, natural language based query system for relational databases 2—23344
- portable programming environment for small business applications 2—23372
- PORTAL, real time programming language 2—39378
- PPL, Picture Processing Language, interactive high level language system 2—28264
- PRISM, simulation language 2—44119
- problematic features of programming languages: a situational-calculus approach 2—23049
- procedure oriented programming techniques *(Japanese)* 2—39227
- programming languages and their appls. *(Spanish)* 2—31140
- PROLOG language 2—23146
- Prolog programming textbook 2—43186
- PROTO-E extensible programming language system, design and evaluation *(Japanese)* 2—35146
- QS FORTH for Atari, review 2—44277

high level languages continued
- query languages, computational power 2—43327
- query languages, impact on productivity 2—40654
- query languages for some current DBMS 2—35314
- query translation system XQL 2—31248
- query validation: reverse translation and the connection an selection trap 2—35315
- Query-by-Example, programming for nonprogrammers 2—43170
- RADS, ICL rapid application development system 2—23163
- real time control with concurrency 2—33629
- record structures processing technique for compilers 2—35188
- REL ENGLISH database user performance 2—31251
- relational data model statistical user interface 2—31249
- relational query language with embedded functional dependency *(Japanese)* 2—35300
- retrieval language of social sciences and natural sciences, statistical investigation 2—27497
- review of present situation *(German)* 2—23149
- reviews 2—23142
- RPL, BASIC and FORTH comparisons 2—35118
- Runic: an interactive, extensible compiler 2—27515
- Runic, compiler writing 2—31159
- S/SL syntax semantic language 2—31113
- SCOL—a high-level structured language for process control 2—39345
- SDL, CCITT specification and description language 2—31149
- SDL, CCITT specification and description language 2—39351
- SDL, specification and description language, past, present and future use 2—39373
- SDL, specification and description language, use in Australia 2—39372
- segmented architecture, effects on HLL 2—27499
- selection of languages and operating systems and current software development work *(German)* 2—39474
- semantic structure of information, abstract storage architecture 2—35176
- SEVAL high level validation language in administrative system 2—35160
- SIDL languages for complex software installation 2—23179
- Signal Processor Applications Software from Intel 2—39341
- Simula language, class concept 2—23137
- SIMULA portable system, S-Code *(Norwegian)* 2—23195
- simulation model for the design process *(German)* 2—22969
- SL1, switching systems software development, specification and design tool 2—40236
- small computer implementation of problem-oriented languages *(German)* 2—31136
- Smalltalk, programming for nonprogrammers 2—43170
- SNOBOL 3 high speed processor *(Japanese)* 2—35192
- software metrics 2—28750
- software portability 2—23117
- SPECIAL language for software specification 2—23168
- special-purpose linguistic and literary analysis language FANGORN 2—44183
- Specification & Description Language application to SPC system software development and maintenance 2—33945
- specification language for dialog user interfaces 2—31903
- SR distributed programming language 2—43175
- SRL, semantic representation language implemented in LISP 2—40430
- statistical database use, SLANG statistical language for descriptive time series anal. 2—35744
- statistical packages, simple query language requirements for research data management 2—39843
- steel works automation, distributed microprocessor system *(German)* 2—21679
- STEL, formal differentiation of set theoretic expressions 2—31114
- string processing language 2—43176
- Super FORTH for Apple, review 2—35120
- Super PET Commodore SP 9000, high level language facilities *(German)* 2—38805
- switching systems, CCITT languages 2—40231
- symbolic language and translator for CAMAC system with 131 processor *(Polish)* 2—23161
- syntactic metalanguage standard 2—23184
- syntax of user-defined dyadic operators 2—39366
- syntax-directed translators based on programming R-technology 2—31162
- systems analysis and simulation appl. 2—35165
- T-PROLOG, very high level simulation language 2—43159
- teaching using programmable calculator 2—24783
- TI Logo graphics 2—24446
- TRAFCOL-76 for traffic engineering appl. 2—33753
- transformation language for tables of economic indices *(Russian)* 2—35137
- TransFORTH II language and operating system for Apple II 2—35116
- Triplex language for interval arithmetic 2—27506
- TYMES, language for control and data manipulation in behavioural research experiments 2—36144
- universal natural human-computer interface language 2—27509
- user-computer interaction languages, uniformity, compromise solution 2—35711
- utilisation for cross-assembler 2—31161
- VALI (variable language interpreter) high level language architecture 2—23193
- variable addressing mechanisms in block structured languages, performance analysis 2—23153
- very high level languages, numerical applications 2—35171
- VLSI circuit design, data flow language proposal 2—40196
- VLSI design language 2—35168
- VLSI structures, high level language program mapping 2—26728
- ZGRASS graphic language 2—23141
- Zilog PL/Z family of microcomputer programming languages 2—23148
- language for interoffice signalling network, common channel, Bell System 800-service support, distributed database use 2—39028

high-pass filters
- active AF filter CAD using BASIC program *(Spanish)* 2—31843
- digital filter, phaseless recursive, implementation by simple subroutine written in Fortran 2—40123
- equalizer design for low-pass, high-pass and band-pass filters, BASIC program 2—43878

high power amplifiers *see power amplifiers*

high-pressure techniques
- No entries

- **high-temperature techniques**
  - *see also pyrometers*
  - No entries
- **high vacuum gauges** *see vacuum gauges*
- **high-voltage engineering**
  - *see also high-voltage techniques*
  - application of a digital computer program to transient analysis and design of HVDC and AC thyristor valves 2—40075
  - buried power transmission systems simulation, computer graphics options 2—28145
  - calculations of the sag at cable span connections in high-voltage switchgear *(German)* 2—43842
  - control of thyristors in power transformer tap switch 2—21602
  - electrical induction on fences due to faults on adjacent HVDC transmission lines 2—43855
  - electrostatic modelling of electron-beam-generator/vacuum-diode interface 2—40014
  - experience with AC tie line and frequency control on the Vancouver Island HVDC link 2—37677
  - high power electrical equipment-testing laboratory, control system 2—38115
  - HV line loss anal., using BASIC computer language 2—31800
  - increased performance of HVDC power modulation by active and reactive power coordination and modern control design 2—37674
  - new scheme for damping of subsynchronous resonance in series compensated AC transmission systems 2—37669
  - recovery of the HVDC transmission after faults in the AC system 2—37673
  - study of thyristor valve turn-on electromagnetic processes in very large high voltage valves 2—40035
  - system planning for a large HV network incorporating static VAR compensators and HVDC systems 2—40074
  - system planning studies for static VAr compensation and HVDC in large EHV networks 2—29712
- **high-voltage techniques**
  - HV impulse generator control by microprocessor 2—40086
- **history**
  - Allied landings 1944, simulation game 2—24718
  - art history interactive videodisc image retrieval system development project 2—44179
  - automated microwave network analyzers, computer-controlled systems, history 2—38054
  - COBOL pioneering work of G.M. Hopper 2—23119
  - Columbus route investigation with Apple 2—36175
  - computer development over 30 years 2—34664
  - computer memories and storage, developments *(German)* 2—30558
  - control theory development *(Japanese)* 2—29402
  - data processing and computing, instructional 16 mm films 2—36356
  - ink-jet printing, review 2—27286
  - microcomputer appls. 2—36181
  - microcomputer natural history 2—34626
  - Philips-Europe, IC CAD review in historical perspective, present-day interactive systems 2—40216
  - scientific calculators, 10 years' developments *(German)* 2—34635
  - TRS-80 microcomputer 2—19857
- **HIXE** *see ion microprobe analysis; X-ray chemical analysis*
- **hobby computing** *see personal computing*
- **hodoscopes** *see cosmic ray apparatus*
- **hoisting equipment** *see hoists*
- **hoisting machinery** *see hoists*
- **hoists**
  - *see also materials handling*
  - electric drives, frequency-controlled, construction for hoisting and transport mechanisms 2—21599
  - subordinate control systems, doubly integrated, synthesis for DC drives of mine hoisting machinery 2—21598
- **holographic instruments**
  - *see also holography*
  - IBM 3687 Supermarket Scanner, holographic deflector disc 2—31447
  - memory device capacity, influence of aberrations caused by system misalignment 2—22616
  - processor for associative information retrieval 2—31589
- **holographic interferometry**
  - aerodynamic flow meas. appl. *(French)* 2—24301
  - double-sided holographic interferometric technique for surface displacement determ. 2—35752
  - reassessment of appls. 2—42657
- **holographic storage**
  - hologram memory device capacity, influence of aberrations caused by system misalignment 2—22616
  - page former using liquid crystal matrix *(Russian)* 2—34603
  - planar waveguide-optical fibre system for holographic memory devices 2—26934
  - reassessment of appls. 2—42657
  - PLZT page composer production for holographic memory *(Hungarian)* 2—22612
- **holography**
  - *see also acoustic holography; computer-generated holography; holographic instruments; holographic interferometry; holographic storage*
  - computer processing of holograms 2—43735
  - FIR digital filters, appl. to hologram image reconstruction 2—22491
  - HOLMES project for scanning and measuring HOBC bubble chamber holograms 2—43734
  - image analysis system, for holographic droplet spectra *(Chinese)* 2—29131
  - LSI manufacture, micropattern position control using laser holography technique *(Japanese)* 2—37851
  - memories, random phase mask efficiency 2—34606
  - reassessment of appls. 2—42657
  - recognition system modelling 2—30843
  - vector ray tracing computer anal. of holographic systems, comment and reply 2—27948
- **horology** *see time measurement*
- **hospital administration** *see medical administrative data processing*
- **hot cathode tubes** *see thermionic tubes*
- **hot pressing**
  - robot integration with automatic straightening press, pellet shuttle system and CNC grinders 2—41918
- **hot pressing** continued
  - workshop automation in ferrite press shop *(Russian)* 2—21744
  - Al alloy, isothermal pressing, automated control, adaptive system *(Russian)* 2—29815
- **hot rolling**
  - computer control system for hot strip mill 2—41818
  - draught regulation microprocessor appl. *(German)* 2—21677
  - gamma-ray thickness gauging system for hot steel plate rolling 2—29817
  - high dimensional system, identification by general parameter method 2—41492
  - hot strip mill, process control philosophy *(Italian)* 2—21693
  - hot strip mill, strip thickness control *(Italian)* 2—21692
  - hot strip mill computerised production control system 2—33687
  - laminated strip planarity and beam section checking by optical triangulation *(French)* 2—37738
  - steel, derivation of linearized model and cooling control 2—33606
  - steel mill reheat furnaces, cost cutting and energy saving 2—21680
  - three zone reheating furnace, design development and performance of online computer control 2—29818
  - Usinor Dunkirk 4-high plate hot rolling mill automation *(French)* 2—37735
  - X-ray gauge for hot strip thickness profile meas., on-line microprocessor controlled system 2—37739
- **hot working**
  - *see also hot rolling*
  - No entries
- **household appliances** *see domestic appliances*
- **Hubble model** *see cosmology*
- **human engineering** *see ergonomics*
- **human factors**
  - *see also biocybernetics; ergonomics; man-machine systems*

industrial robots
AB Bofors Kilsta die forging press line, survey 2−21802
actuators in robots, power optimisation problems 2−37753
adaptive welding robot development 2−41908
advances in sensory systems, control languages 2−33627
agricultural robots *(French)* 2−21437
alternative robot systems evaluation under uncertainty, model 2−37104
ANIMA image analysis, quasi real time system 2−36911
arc welding, microcomputer-controlled adaptive positioning system 2−26114
arc welding robot system using microprocessor-controlled invertor 2−41910
arc welding robots, advantages *(Dutch)* 2−26071
arm control, hierarchical control structure using special purpose processors 2−37804
assembly, automatic vs. manual, economic considerations 2−41830
assembly and artificial vision *(French)* 2−33677
assembly appl., parts presentation techniques 2−41896
assembly appl. in the USSR 2−29831
assembly appls. of robots, classification and examples 2−37754
assembly automation, conf., Stuttgart, Germany (May 1982) 2−41886
assembly line balancing and assessment, manual and robotic operation simulation 2−41905
assembly research, part mating processes integration 2−29919
assembly robots, silhouette area and centroid measurement 2−26115
automatic assembly lines, industrial robots appl. *(Italian)* 2−26078
automatic versus manual assembly, boundaries of economy at middle or low batch production 2−41899
automobile computerised production line dimensional control by robots, Phoenix system *(Italian)* 2−26077
automobile industry robotics, conf., Birmingham, England, (April 1982) 2−41901
automobile industry robotics, economic efficiency and flexibility 2−40510
automobile industry spray painting robot application and operating experience 2−41902
automobile manufacturing operations appl. 2−21800
axis control design, appl. of MODIAC multimicroprocessor system *(Italian)* 2−41825
basic technology 2−29874
British factory automation, robot technology 2−26074
British Leyland's automation, Metro plant 2−29871
British Leyland Longbridge plant, appl. 2−21796
CAD/CAM, industrial automation levels *(Italian)* 2−27796
capabilities and reasons for use 2−21666
car body construction and assembly applications 2−41921
car body manufacture using flexible robot systems *(German)* 2−41877
car component assembly by modular robot 2−41914
car industry labour-management relations influencing introduction of robots 2−40509
car manufacturers developing industrial robots 2−33637
chocolate decoration using robot vision 2−29943
circular scanning strategies for rapid 2-D object acquisition 2−21806
closed loop control using non-contacting optoelectronic instruments 2−33698
CNC lathes, loading and unloading appl. 2−33621

industrial robots continued
colloquium on Real Time Image Processor architecture for use in computer vision robotics, London, England, 14 April 1982 2−30554
compound logical input devices 2−28299
computer aided planning of appl. in workpiece handling 2−43520
computer vision and robotics laboratory 2−40944
computer vision and tactile sensor techniques *(Japanese)* 2−41863
computer-assisted dimensioning of manufacturing cells equipped with robots *(German)* 2−41843
continuous path control system, data flow and characteristics 2−41912
control, force/moment sensor construction and appl. *(German)* 2−33683
control and force-torque sensing, appls. 2−26100
control industry, impact of robots 2−33585
control of flow of materials in manufacturing *(German)* 2−41653
control of mechanical manipulators, approximate joint paths 2−37803
control of simple motions using programmable controllers 2−33384
control system, distance sensor principle *(Japanese)* 2−41873
coordinate transformation using PEARL real time process control program language *(German)* 2−41841
Csepel Machine Tool Company, Budapest, flexible manufacturing systems 2−29868
curved surface measurement and recognition for robot vision 2−29159
curved surface measurement for robot vision 2−36913
DC motor controller, power switching circuitry 2−29727
DEC terminal manufacture using robots 2−33710
design methods for fine engineering appl. *(German)* 2−26107
deterministic and nondeterministic programming in robot systems 2−32860
development and use worldwide, Spanish situation *(Spanish)* 2−29832
development of robots and design of processes *(Russian)* 2−26090
developments in robotics field 2−29870
digital programmable industrial electronic systems legal and safety requirements 2−29845
direct digital control of electrohydraulic system 2−33479
distributed microprocessor control system 2−26113
dynamic model of a robot, automatic generation 2−41871
effects on production, work and employment 2−36336
elastic mechanical systems, controller and observer design *(German)* 2−41285
electrohydraulic robot drives, improvement of static and dynamic characteristics 2−37750
employment effects, anal. in France *(French)* 2−19948
EPAAS experimental assembly robot 2−41859
expert systems technology 2−41802
FAB-1, robot system for floppy disk drive assembling 2−37847
Fiat's flexible manufacturing system 2−29945
fission reactors, inspection and repair, robot appls. 2−41875
flexible and programmable automation advances *(Japanese)* 2−41862
flexible manufacturing system with laser machining, Japanese R and D programme 2−29907
flexible work-centre with electropneumatic robot *(German)* 2−41876
force-sensing system for industrial robots *(German)* 2−29848
Ford truck manufacture, applications of robots 2−41909
forge and foundry industry appl., improvement of quality and productivity 2−37732
forging manipulator, CNC electrohydraulic drive for positioning 2−29604
France, conditions for success of industrial robotics *(French)* 2−33676
Fujitsu Fanuc, Japanese robot manufacturer, product review 2−29866
Fujitsu Fanuc's partially unmanned factory 2−33636
General Motors, assembling and machine loading appl. 2−29867
General Motors, flexible automation systems 2−33651
Genesis series of hydraulic computer controlled robots, construction, technology 2−26099
geometric modellers for robot programming 2−21810
German robot industry 2−37777
GIZAMAT I and II, design building, programming, and functioning *(Spanish)* 2−29835
grippers for integrated robot-press units 2−37729
gripping and vision system for acquiring cylindrical workpieces from bins 2−29863
handling and assembly in space, robot manipulator control 2−30036
heavy engineering appls. of industrial robots *(Russian)* 2−26086
Hitachi Production Engineering Research Laboratory, assembly automation work 2−29827
human workers effect of robots on jobs, and advantages of robots 2−33641
hydraulic gripper with variable gripping angles 2−30183
hydraulics industry, relevance of robots 2−33642
IBM research review 2−37697
ICAM programme of USAF, overview 2−29906
image understanding techniques and appl., conf., Washington, DC, USA (Apr. 1981) 2−35997
implementation in manufacturing, social aspects *(German)* 2−36335
industrial production automation development *(German)* 2−29896
influence on qualification and strain 2−40511
information and manufacturing technology, world trends 2−31335
installation of robots, management *(Spanish)* 2−28535
integration with automatic straightening press, pellet shuttle system and CNC grinders 2−41918
intelligent machine prototype *(German)* 2−21655
intelligent sensor-controlled robots, research work 2−41861
introduction and applications at EMA-controlled plants *(Polish)* 2−21774
Italian car body assembly system using flexible industrial robot systems 2−29901
Japanese 1981 stated art of advanced sensor techniques 2−21704
Japanese industry appl. 2−37779
Japanese introduction of robots 2−20043
Japanese manufacturing technology trends 2−29910
job shop automation strategies, benefits 2−21727
joint torque control by direct feedback 2−21804
labour intensive tasks, capability and limitations, multiple purpose sensor appls. 2−33602

languages, RAPT/VAL/CADD53 comparison 2−23199
languages for industrial robots 2−21809
machine tool loading appl. *(German)* 2−37764
machine tool loading appl. *(German)* 2−37770
machine vision, industrial appls., conf., Research Triangle Park, NC, USA (May 1982) 2−33601
machine vision for discrete part handling in industry, survey 2−33701
machining automation with SPM-MPM manipulator *(Russian)* 2−21745

industrial robots continued
maintenance considerations 2−41854
manipulating and inspecting systems, state-of-art review *(Italian)* 2−26076
manipulation environment, modelling and monitor using TV camera/laser system, computerised control *(Japanese)* 2−33623
manipulation robot trajectories, optimal synthesis method 2−37796
manipulation robots: computer aided design and control synthesis 2−37787
manipulator, computer controlled, for deriving mechanical characts. of objects 2−29921
manipulator control using adaptive self-tuning controllers 2−26118
manipulator dynamics using principal transformations, characts. anal. 2−41884
manipulator grip compression force control algorithms 2−21715
manipulator interactive dynamic control synthesis procedure 2−41855
manipulator program motions construction 2−21716
manipulator programmed control synthesis, appl. 2−29916
manipulator systems, computer-controlled, removable robotic devices 2−26081
manipulators, series M and PR, in production automation *(Russian)* 2−26014
manufacturing technology, conf., Stuttgart, Germany, (Oct. 1979) 2−29905
materials handling appls. 2−37504
materials handling developments 2−29914
microcomputer control of a robotic arm in a distributed computing environment 2−41883
microcomputer controlled, for contact spring sets adjustment *(German)* 2−41842
microcomputer controlled equipment for two-dimensional object recognition *(German)* 2−42878
microelectronics and robotics, technological progress 2−40507
microprocessor based sequence controller 2−33654
microprocessor control system 2−26116
microprocessors implementation of an adaptive controller for robotic manipulators 2−37805
microrobot technology 2−33620
miniMETRO manufacturing facilities, automation 2−21799
mobile, using self-adapting low cost sonair 2−21700
mobility and safety considerations *(German)* 2−41880
model based vision and the MCL language 2−21807
modularity, technical aspects and applications 2−41911
motion description and languages *(Japanese)* 2−41864
motion programming methods 2−37806
multijointed finger system, computerised control for precise object handling 2−33440
NC lathes, automatic workpiece manipulation *(German)* 2−29900
Newton-Euler formulation of manipulator dynamics for computer control 2−29917
nuclear power plants, appls. of robots *(Japanese)* 2−29678
numerically controlled lathes, robot operated *(Russian)* 2−33659
object recognition capability, tests for industrial use *(Norwegian)* 2−37763
oil pump assembly involving industrial robot, real-time processor and tactile sensor 2−41915
open-die forging manipulation using ASEA Rb-60 robot 2−29824
optical inspection and machine vision appls. 2−33699
optimal guidance of motion, man-machine interface 2−29653
optimum control of nonlinear dynamic systems for industrial robots control 2−37742
overview 2−24621
PAG measuring robot construction and operation *(Dutch)* 2−26317
PAM, microprocessor controlled programmable arm manipulator 2−33656
parts handling, product building and process implementation appl. 2−29875
parts handling equipment review 2−33447
PCB insertion of ICs, automatic machines *(German)* 2−29877
pharmaceutical industry, automation of filling and packing of tablets 2−37808
Philips experimental assembly robot 2−37789
plant search for possible robot appl. 2−29862
plastic part treatment production line using programmable robots, management flexibility *(French)* 2−21761
pneumatic distributors for robots, power characteristics and control methods 2−37752
POINTY system for robot programming using teaching-by-guiding method 2−29918
polishing machine with vision feedback, for brass die castings defects removal 2−21703
position control with decoupling by inverse system 2−26102
potential appls. evaluation in system context 2−33643
process automation-supervisory systems, industrial robots and control *(German)* 2−37702
program controls, development and realisation *(German)* 2−37786
programmable assembly lines with industrial robots *(German)* 2−33668
programmable assembly systems, layout for small batch numbers and high diversity of variants 2−41898
programmed learning processes to assist engineering design *(German)* 2−25209
programming languages, conf., London, England (Feb. 1982) 2−21808
programming languages and techniques *(German)* 2−29847
real-time vision system for industrial appl. 2−29655
remote control of industrial robots 2−37751
research areas 2−29785
resistance welding robotic system development 2−41907
review *(French)* 2−29883
RKTB series robots *(Russian)* 2−26089
ROBOT CONTROL M equipment, functions and capabilities 2−29894
robot-assisted flexible process system 2−41920
robotics, using TV picture information, technology, appls., future developments *(Spanish)* 2−29889
SAM fast industrial vision system appls. 2−33702
SATIR visual system, VLSI design 2−33704
scheduling of parallel computation for a computer-controlled mechanical manipulator 2−29864
second-generation, UK (SERC) research program 2−21697
self-learning automaton with variable resolution for high precision assembly by industrial robots 2−41849
sensing, teaching and long term control, stochastic control theory appl. 2−41882

industrial robots continued
sensing systems 1981 state of art, General Motors' developments 2—21698
sensor system architecture, modular approach 2—21702
sensors developments at Hull University, hardware and software aspects 2—21701

aircraft, combined control system synthesis and performance evaluation by hybrid computer complex 2—33849
aircraft engine output sensors, real-time failure detection 2—36099
aircraft parameter identification in presence of atmospheric turbulence 2—33829
architectural noise, Kalman's filtering theory under preestablished estimation algorithm form *(Japanese)* 2—36974
ARMA parameter estimation procedures, numerical properties 2—36632
attitude determ. systems, fault detection and isolation 2—37928
block signal processing 2—20817
cardiovascular signals, detect. of trends in long term recordings 2—43782
deconvolution program for processing radiotracer dilution curves 2—43751
discrete time complementary models and smoothing algorithms, correlated noise case 2—25303
discrete time distributed parameter filtering, appl. to environmental data processing 2—41483
distributed parameter system with pointwise disturbances, filtering 2—21317
distributed parameter systems, suboptimal Kalman filter 2—25763
dynamic scene model, estimation theory approach 2—36887
dynamic state estimation including anomaly detection and identification for power systems 2—40918
dynamical processes, parameter identification, recursive max. likelihood and related algorithms 2—20656
econometrics and time series anal. appls. 2—20773
failure detection and isolation method 2—20606
fault tolerant approach to state estimation and failure detection in nonlinear systems 2—36813
finite sample prediction and overdifferencing 2—32547
flexible structures, digital stochastic control of distributed parameter systems 2—21896
floquet decomposition of the periodic Kalman filter 2—25314
global economic forecasts assessment based on Kalman filter and econometric model 2—37088
groundwater flow modelling, simplified, Kalman filter based identification appl. 2—33036
images degraded by motion blur and additive noise, digital approach for restoration 2—32935
Kalman-Bucy filter with specified input 2—41048
least squares filtering problems, relation between filter using covariance information and Kalman filter 2—36944
limiting accuracy under low measurement noise, and selection of measurement sets 2—20843
linear filtering problems configuration, comments 2—41049
linear steady state gain identification by use of pseudo innovation process and output's statistics, comparison of four algorithms 2—41399
man-machine system interaction, statistical optimisation 2—25316
Markov process limit theorem, used for discrete Kalman filter message model *(Rumanian)* 2—28879
minimal order observer proof 2—40903
NC lathes, tool breakage prediction using Kalman filters 2—33184
parameter identification in lumped linear continuous systems via Poisson moment functionals 2—29084
parametric failure detection and estimation in linear systems 2—36814
polynomial estimators, extended Kalman filters 2—29110
population forecasting, appl. of adaptive stochastic state space models 2—29388
power system stability, parameter identification using Kalman filter for anal. 2—40892
pseudomeasurement and extended Kalman observers, comparison 2—25196
reaction zone control, sensor location for estimation of unmeasured disturbances 2—26137
recursive Kalman window approach to image restoration 2—29141
restoration of images degraded by motion blur and noise 2—25248
restoration of images degraded by motion blur and noise 2—40967
return-difference matrix properties of optimal linear stationary estimation and control in singular case 2—25174
Ricatti equation, decoupled decomposition 2—32447
road traffic noise, dynamical estimation method of objective noise under background noise *(Japanese)* 2—36973
seismic detection of personnel, adaptive and learning algorithms 2—20728
sensor selection in linear estimation 2—40928
smoothing problem and variations, data analytic approach 2—25305
square root Kalman filtering for high-speed data received over fading dispersive HF channels 2—41054
steady state optimal filter gain estimation with coloured observation noise 2—36809
stochastic discrete time linear optimal regulator design, relationship between control laws based on time series and state space approaches 2—41414
telephone networks, echo cancelled using fast Kalman filter algorithm 2—42040
time-invariant discrete Kalman filter, exact soln. 2—20782
two-dimensional cyclic phase estimator implementation using nonlinear digital filter 2—25286
two-dimensional digital noisy image appls., non-separable autocovariance function 2—34489
urban network, gas distribution control, Kalman filter appl. *(Italian)* 2—21445
weapon control state estimation errors due to airborne Kalman filter data input delays 2—38005

Kelvin-Helmholtz instability *see flow instability*

keratin *see proteins*

matrix algebra continued
closure in independence systems 2–36727
combinatorial problem involving graphs and matrices 2–32680
common divisors of polynomial matrices 2–20272
computational fluid dynamics, future prospects 2–43691
congruence and conjunctivity of matrices to their adjoints 2–22148
continuously differentiable function minimisation, convergence using variable metric matrices *(French)* 2–32733
control trajectory of linear objects, iterative improvement *(Russian)* 2–25666
convergence analysis, eigenvalue location of matrices 2–36494
coordinate relaxation, global convergence in case of unsymmetrical, diagonally dominant Jacobian 2–38166
counting matrices by Drazin index 2–32421
covariance matrices computing from data with missing values 2–30221
cyclicity of polynomial systems 2–20274
cyclicity of polynomial systems 2–26470
data adaptive signal estimation by singular value decomposition of a data matrix 2–36977
decentralised fixed modes elimination with reduced information exchange 2–21232
decomposable bilinear numerical radii 2–24922
dependent quadratic forms, gammaization 2–32560
diagonal dominance, generalised, in connection with accelerated overrelaxation method 2–28785
diagonal dominance, optimal reduction off-diagonal elements 2–29406
digital filters, linear cct. signal flow graph anal., matrix and topological representations 2–22487
discrete Lyapunov matrix equation 2–24903
discrete-time systems, inners and algebraic stability *(Japanese)* 2–33291
doubly stochastic matrices over arbitrary vector spaces and the Birkhhoff theorem 2–24916
dynamic capacitor circuit anal. method 2–28216
dynamic systems, diagnosis using sensitivity functions *(Russian)* 2–29040
dynamic systems multilevel control *(Slovak)* 2–41371
dynamical systems, constructive stability 2–20584
edge colouring approach to matrix decomposition 2–22292
eigenvalue bounds for algebraic Riccati and Lyapunov equations 2–24946
eigenvalue computation using very large symmetric matrices using Lanczos algorithm 2–20251
eigenvalue estimation using Lanczos algorithm 2–22150
eigenvalues of symmetric tridiagonal matrix, modified bisection algorithm for determ. 2–26479
exact probabilities of obtaining estimated non-positive definite between-group covariance matrices 2–32591
factorisation, WZ algorithm, implementation on ICL distributed array processor 2–38158
families of regular designs based on geometries 2–20256
filtered rings, determinants *(French)* 2–20240
finite escape phenomena for matrix Riccati equations 2–40697
first-order linear differential matrix eqns., exponential soln. 2–42223
first-order scheme, convergence rates, improving 2–22145
forced motion computation in linear multivariable discrete systems 2–37273
Fredholm integral equations with stationary kernels, fast numerical solution 2–30272
Gaussian elimination, theory and BASIC program 2–38162
generalised block pulse operational matrices, appl. to operational calculus 2–36500
generalised ladder canonical forms, state-space structures 2–25309
generalised Sylvester matrix, polynomials qualitative anal. 2–24897
generalized M-matrices 2–20267
geometric mesh, L_∞-boundedness of L_2-projections on splines 2–22120
graph theory, distance-regularity in graphs 2–28969
Hermite invariants and canonical forms for reachable system matrices 2–25612
highly concurrent computing structures for matrix arithmetic and signal processing 2–26742
hyperbolic equations, linear, fast solution of implicit methods 2–26509
identification of dynamic plants by using matrix square roots 2–25150
IIR digital filter implemented by signal processor IC 2–22499
images with white Gaussian noise, restoration by two-dimensional maximum a posteriori estimation 2–20747
imaginary roots determ. using theory of inners 2–36504
implicit complementarity problem 2–34146
indeterminacy principle and regularization of linear systems of algebraic equations *(Russian)* 2–34139
inequalities method, improved time-response algorithm 2–21140
infinite dimensional time-varying linear dynamical systems realizability 2–37344
infinite pole and zero considerations for system transfer function matrices 2–25613
input retrieval in finite dimensional linear systems 2–37203
integrability of matrix coefficients 2–32426
interconnected power system automatic generation control using optimal and decentralized suboptimal controllers 2–33533
interval extensions of factorable functions and derivatives, computer generated 2–20534
inverse Levinson problem soln. in multichannel case via Lyapunov eqn. 2–25307
inverses of banded matrices 2–20261
inversion of large sparse matrices: direct methods 2–30227
inversion of matrices, TI59 program for circuit analysis 2–35931
invertibility of band matrices 2–28794
iron cored, computation of magnetic forces acting on widings using numerical algorithm 2–35888
irreducible nonnegative matrix, cyclic index 2–42202
isomorphic graphs, representative selection of matrices describing classes *(German)* 2–30277
iterative refinement, use in soln. of sparse linear systems 2–38319
Jacobi's method, convergence conditions 2–34145
Lanczos biorthogonalization algorithm and other oblique projection methods for solving large unsymmetric systems 2–38165
large scale engineering systems solution and optimisation 2–31968
large scale systems, order reduction by aggregation *(Chinese)* 2–20563
large set of equidistant $(0,+1,-1)$ vectors 2–20292
large sparse linear systems solving, iterative methods 2–30228
large systems of linear algebraic eqns. soln. on ES series computers 2–39832
Latin rectangles no. of two- and three-line examples 2–28948

matrix algebra continued
least squares computations and the condition of the matrix 2–20383
Leontief substitution systems and matroid complexes 2–28982
linear admissible estimates, note *(Chinese)* 2–32416
linear algebraic systems, matrix eqns. solution 2–29418
linear boundary-value problems, soln. by extended invariant embedding 2–38177
linear differential eqns. soln. using Walsh functions 2–38175
linear equations solving using incomplete Cholesky conjugate gradient iterative method 2–30229
linear parametric functions, estimability *(Chinese)* 2–20616
linear programming basis matrices, restructuring prior to inversion, investigation of algorithms used 2–32762
linear simultaneous eqns., soln. by parallel iterative methods 2–34142
linear space invariant 2-D deconvolutions, novel matrix approach 2–41046
linear systems of eqns., soln. on microcomputer using Schmidt orthogonalization matrix inversion *(German)* 2–34149
linear systems over commutative rings, matrix fraction representation 2–29042
linear systems over rings, relation between stable matrix fraction factorizations and regulable realisations 2–33206
linear systems over rings, stable matrix fraction factorizations, relation with regulable realizations 2–21167
linear-quadratic multivariable regulators, stability margins and generalised structural robustness *(French)* 2–33276
location of matrix eigenvalues in the complex plane 2–41312
lower closure problems with weak convergence conditions 2–28997
LQ-problem, weighting matrix selection for location of all poles in specified region 2–41349
LSQR: an algorithm for sparse linear equations and sparse least squares 2–30198
LU decomposition of M-matrices by elimination without pivoting 2–20260
Luenberger form computation, numerical stability 2–28795
Lyapunov algebraic matrix eqn. solns. and bounds for extremal characteristic roots *(Japanese)* 2–42226
Lyapunov matrix eqn. $BX-XA=C$, solns. 2–24904
M matrices, square roots 2–24914
matrix inversion routine in BASIC 2–36232
matrix-operation dedicated array processors for VLSI devices, matrix data flow language 2–28234
matroids, independent sets of arbitrary fixed rank 2–28949
measurements anal. based on singular value decomposition 2–20888
metric variant of Frobenius's theorem and some other remarks on positive matrices 2–24918
minors and permanents expressions 2–20259
mixed dominance in decision matrices 2–28855
multicircuit transmission lines combined electromagnetic and electrostatic unbalances 2–24197
multiinput multioutput adaptive control, role of interactor matrix 2–29486
multivariable feedback system, robust control, overview 2–33279
network transfer function calculation between cct. branches and cobranches, matrix and graph appls. *(Rumanian)* 2–24203
non-singular information matrices and local identifiability 2–36783
nondegenerate forms, equivalence classes 2–20265
nonnegative, generalised inverses and semigroups 2–20268
nonnegative matrices with power invariant zero patterns 2–26472
nonnormal, spectral variation 2–24920
nonnormal matrices, residual bounds on approximate eigensystems 2–38164
norm-preserving dilations and their applications to optimal error bounds 2–38163
normalized doubling algorithms for finite shift-rank processes 2–25301
observer design for linear systems, appl. of matrix generalised inverses, comments 2–40908
one dimensional digital filter structures anal., simplified matrix representation 2–38605
operator techniques based on stepwise images, averaging matrix construction *(Ukrainian)* 2–20246
orthosymmetric determinant, expectation of square root 2–28908
parallel Jacobi methods, for eigenvalues and single value decomposition 2–38157
parallel matrix and graph processing algorithms 2–30358
parameter identification via Laguerre polynomials 2–20644
partial characterisation of class of matrices defined by solutions to linear complementary problem 2–36501
partial pivoting strategies for symmetric Gaussian elimination 2–20269
partial realisations, existence, uniqueness and minimality 2–36507
partial state observer construction by generalized matrix inverse 2–36784
permanents of 0,1 matrices, computational method using row operations 2–22151
Perron-Frobenius theory, contraction mapping approach 2–36680
perturbations in eigenvalues 2–26473
physiology, operator state modelling, appl. of aggregation algorithm *(Russian)* 2–21072
pivotal strategies for sparse plane rotations 2–26466
pole assignment via Sylvester's equation 2–25585
polynomial eqn. soln. 2–36505
polynomial matrices and dualities 2–28793
population projection model, bounds on dominant eigenvalue 2–25373
positive diagonal matrix existence study 2–20250
positive-integer solutions to linear system of homogeneous equations, Petri nets appl. *(French)* 2–34287
power network fault analysis algorithm using phase admittance matrix model 2–35896
power system impulse driving-point impedance functions, multinode formulation and applications 2–31789
power system impulse driving-point impedance functions, principles and single line derivation 2–31788
power system probabilistic flow distribution anal. *(Russian)* 2–40023
power system short circuit problems solution using two step compensation method 2–40045
power system transient stability anal. using digital computer program employing efficient network reduction technique 2–35897
precedence functions 2–38155
primary images, efficient calc. from set of images 2–40980
principal phases of square nonsingular transfer function matrix, sensitivity to additive perturbations 2–41261
projective theory of networks 2–28980

mechanical engineering computing continued
  flexible production systems, prerequisites for linking machining centres *(German)* 2—29897
  freely supported beam, hybrid simulation of transversal vibrations *(Czech)* 2—44018
  gas accumulator, polytropic exponent calculation 2—31955
  gear-teeth problems rationalisation *(German)* 2—24414
  GEAROS method for gear optimisation by means of computer aided engagement simulation *(German)* 2—23350
  general structures, creep induced buckling 2—44026
  graphics program adaptation for machine design to graphic data display *(Russian)* 2—28336
  gyrogrinder, computer aided direct search multiparameter optimisation 2—28335
  Hamilton formulated problems, solution 2—44042
  HIMADES-1 interactive machine design system developments based on hierarchical network model *(Japanese)* 2—31958
  hybrid gasoline electric vehicle, analogue simulation 2—31961
  hydraulic control manifold design automation program package *(German)* 2—37474
  in-house NC programming using central computer system 2—40343
  INFOS pocket calculator programs for optimisation of cutting values *(German)* 2—21730
  inserted tooth face milling cutter, computer aided determination of optimal cutting values *(German)* 2—21734
  interactive system for detailing of steel frames 2—28346
  internal cylindrical grinding, rationalisation of main and auxiliary operations *(German)* 2—37769
  IPAD, integrated programs for aerospace vehicle design, for productivity improvement 2—21743
  lathe work, computer aided collision monitoring and tool setting determination *(German)* 2—37776
  layout system for high precision design of progressive die 2—44057
  life distribution functions for machine parts, statistical testing 2—24348
  luminous fog lamp mounting assembly dynamic design and mechanical strength enhancement *(Russian)* 2—32005
  machine, automated generation of operations *(Russian)* 2—28337
  machine part shapes, syntactic characterisation 2—40328
  machine tool characts. dynamic testing, modal analysis *(Japanese)* 2—24342
  machine tool dynamic modelling on minicomputers, simplification algorithm 2—24349
  machine tools movements, interactive graphical programming of tool movements *(German)* 2—37775
  machine tools statistical working accuracy calc. *(German)* 2—37768
  machining, automated generation of operations in instrument manufacture *(Russian)* 2—28338
  materials testing, ultrasonic evaluation using digital imaging and image processing 2—28344
  measurement in manufacturing technology, computer solns. in multicoordinate meas. *(German)* 2—39710
  mechanical components design, role of intelligence 2—28342
  minicheck package development 2—28307
  modified secant Newton method for non-linear problems 2—44043
  multispindle gearbox coordinate calculation, program for Iskra-124 desk computer 2—40330
  NC lathes, automatic programming *(Russian)* 2—36076
  NC lathes, tool breakage prediction using Kalman filters 2—33184
  NC processes, graphic display module for NCMES program *(German)* 2—40338
  NC program development on Osborne 1 microcomputer 2—44007
  NC programmes production by microcomputer *(German)* 2—36077
  NC programming, computer-aided, via intermediate hardware *(German)* 2—40345
  object reconstruction from projections, expert system 2—40347
  overhead line stringing, computerised calc. 2—24372
  plate theories, refined, numerical methods 2—42215
  probabilistic models in computer automated slider-crank function generator design 2—24363
  problem-oriented languages, small computer implementation *(German)* 2—31136
  production equipment planning for flexible production systems *(German)* 2—24356
  punch press/plasma cutting machine efficiency improvement via computer-aided programming 2—24358
  rainflow counting algorithm rel. to fatigue data 2—28333
  sheet metal CAD/CAM system 2—29814
  sheet metal CAD/CAM system 2—36073
  sheet metal engineering, computer aids 2—28312
  ship hull design *(Chinese)* 2—31951
  ship structure mechanics, appl. of hybrid simulation techniques 2—36094
  Ship Vibration Diagnosis System, data acquisition and processing system with data bank facility *(Japanese)* 2—31956
  solid modelling scheme for CAM oriented CAD 2—44056
  steam turbine rotor heating, mathematical modelling for operational monitoring appls. 2—36079
  steel, austenitic stainless type 304, creep and fatigue fracture 2—24335
  structural mechanics, use of quadratic functional 2—28321
  structural systems minimum weight design 2—44028
  SUPER SCEPTRE, program for analysing electrical, mechanical digital, and control systems 2—24141
  test automatons programmed for computer dialogue, run-off controls *(German)* 2—38081
  toothed racks, automatic testing, CNC coordinate meas. devices appl. *(German)* 2—29858
  transmission design planning, significance of boundary conditions *(German)* 2—28332
  Transmission Tolerance System for automotive powertrain component anal. 2—24370
  turbogenerator group shaft line static anal. using finite element automatic/computer program *(Italian)* 2—32003
  twist drill manufacture, multimeasurement station with integrated laser measurement system for quality assurance *(German)* 2—38083
  two dimensional blanking waste optimisation *(German)* 2—31964
  volume model evaluation, complexity effect reduction 2—24351
  wind energy programme in USA, data acquisition and analysis 2—31809
  wire drawing, plastic flow and stress/strain distrib., calc., computer program 2—39852
  workpiece handling organisation, program system *(German)* 2—40340
  workpieces, partially visible, recognition and location 2—40348

mechanical organs *see artificial organs*
mechanical testing
  see also creep testing; dynamic testing; fatigue testing; hardness testing; materials testing; mechanical variables measurement
  automobile clutches, automatic torque testing *(Italian)* 2—24374
  electromechanical convertors, programmable load for testing *(Spanish)* 2—34106
  Neitron-8 unit for intrareactor tensile tests of constructional materials over wide deform. rate and temp. range 2—22049
  static tensile testing system, automated 2—26407
mechanical variables control
  this heading is restricted to those variables which are not covered by other specific headings. See also, for example, force control; thickness control; velocity control; vibration control
  Czochralski growth apparatus, automatic, phantom controlled 2—26404
  elastic structure displacement control, integral control with robustness property 2—37397
  en route motion control of a transport robot 2—41950
  large space antenna, static shape determ. and control 2—26209
  manipulator robot motion control algorithms construction via inverse dynamics problem 2—42184
  optimal surface shape control using discrete constant forces 2—29539
  rail vehicle active suspensions for lateral ride and stability improvement 2—29972
  Ar arc welding low-current, thin-walled pipes, arc length automatic control method 2—21771
mechanical variables measurement
  see also elastic moduli measurement; force measurement; pressure measurement; shock measurement; strain measurement; stress measurement; torque measurement; vibration measurement
  error measurement in threaded cutting tools 2—26358
mechanoception
  cockroach giant interneuron system, multivariate statistical anal. of the response to wind puffs 2—29367
  joint position sense, afferent and efferent components, interpretation of kinaesthetic illusion 2—33150
medical administrative data processing
  see also medical computing
  biometrical health screening data program 2—43484
  birth notification, data protection 2—27773
  clinical database, large time-oriented database, RX project, causal relationships 2—31403
  clinical database system, quality control, patient identification problem 2—23621
  computer-generated patient management plans, organisation and human aspects 2—23572
  computerised sequential multichannel analyser, data handling using low cost minicomputer 2—35496
  critically ill, computer systems for facilitating management 2—23568
  data coding problems 2—23574
  database management systems for providing information to management 2—43485
  DEERS, health care eligibility reporting system, military appl. 2—39665
  dental medical office system 2—31409
  dental recall, automated, and information system 2—23629
  dialog used by scientific information centres in medicine and health service of Bulgaria *(Russian)* 2—35502
  Dimension PBX special features simulator for sales demonstrations 2—40255
  distributed processing system, DMHIS, Department of Mental Hygiene Information System 2—31401
  doctor's use of microcomputers 2—35493
  documentation centre, flow of information *(Russian)* 2—35501
  drug ordering and exception system clinical considerations in introduction of computerised system 2—23586
  drug prescribing, rule-based operational system 2—23584
  EOQ inventory control in hospitals 2—23570
  Exeter community health services project 2—35495
  family doctor microcomputer appls. 2—31408
  family medicine computing 2—27774
  general practice systems, patient benefits 2—39666
  general practitioner systems eval. 2—31366
  health, introducing nursing students to computer use 2—23607
  health care, North County health services COSTAR V computer system 2—23597
  health care, viewdata, video and microcomputer services 2—39670
  health centre multiuser system *(Norwegian)* 2—39659
  health information systems for the 1980s 2—35497
  hospital DP staff CICS training seminar 2—40534
  hospital environment, computerised clinical information system, nursing involvement 2—23609
  hospital fees payment, personalised collection letters using laser word processing 2—39664
  hospital finance planning with computerised modelling 2—39647
  hospital information system, medical records department system 2—23617
  hospital information systems, computer-based IV admixture program 2—31411
  hospital information systems 2—23643
  hospital information systems component selection methodology 2—35494
  hospital management, financial modeling in a case mix environment 2—23517
  hospital medical information system, factors affecting physician utilisation, social network anal. 2—23611
  hospital medical records, microprocessor appl. 2—23618
  hospital reimbursement system, data dependent system, New Jersey experience 2—23518
  hospital service costs DP 2—23571
  hospital typing needs, centralised approach, word processing appl. 2—39662
  hospitals, comparison between ones supporting quality assurance 2—31413
  IBM patient care system: an overview of its software 2—35433
  IBM Patient Care System for hospital management 2—39669
  image archiving systems, data flow optimisation 2—27776
  immunology service laboratory, regional, automated filing and reporting using PET 2—23583
  MARI computerised information system functions 2—23644
  microcomputer software of an intelligent terminal for use in medical information systems *(Japanese)* 2—35504
  microelectronics and computers, appls. in medicine 2—35823
  morbidity data acquisition and use in naval environments 2—23630
medical administrative data processing continued
  multi-hospital medical peer review system, computer as support tool 2—24060
  national information system proposal 2—23575
  national information system technology needs 2—23576
  neurological clinic, integrated word and data processing system appl. 2—39663

  clinical databases and physician behaviour, case-mix reimbursement 2—23519
  clinical narrative, automatic encoding 2—23569
  clinical pharmacokinetics, parameter optimisation 2—43748

medical computing continued
- clinical pharmacology research protocol management system implemented on an Apple 2−24057
- clinical practice settings, automated quality assurance system 2−23590
- clinical research, ADAMO, data storage and retrieval system 2−31402
- clinical trial, Fisher test power computation at interim point, in BASIC 2−24014
- clinical trials, quality, concern of three decades 2−31746
- colloquium, London, England (June 1982) 2−39968
- colon crypt epithelium, automated image processing 2−31702
- communication method for patients with respiratory deficiencies *(French)* 2−43766
- community care applications of computers 2−39973
- community health nursing agency, computerised management information system use 2−23603
- computer psychotherapy, acceptability, feasibility and advisability 2−36143
- computerised sequential multichannel analyser, data handling using low cost minicomputer 2−35496
- condition algorithm for medical information system *(Russian)* 2−23581
- cytology screening program for uranium miners 2−24065
- Dataface: a suggested method for visual data reduction for pattern recognition 2−28048
- deaths, grouped survival data, regression anal. 2−24012
- decision support system prototype 2−43775
- decision support systems for health sciences, design 2−20691
- deconvolution program for processing radiotracer dilution curves 2−43751
- defibrillator analyser, microprocessor-based 2−24024
- dental radiographs, digitised image processing for improved diagnosis 2−28086
- development over 25 years 2−43774
- diabetic patient, nursing assessment, microcomputer based data management system 2−23604
- diabetic retinopathy, ocular lesions, correspondence factor anal. computer documentation 2−24043
- DISBAR: a program for two-group discriminant analysis on mixed variables after binary coding 2−31711
- distributed processing system, DMHIS, Department of Mental Hygiene Information System 2−31401
- Doppler US waveforms, online identification and quantification 2−28069
- drug adherence supervision, on-line computer program 2−43740
- drug metabolism and pharmacokinetics, comprehensive simulations 2−24021
- ECG component analysis using a computer 2−43743
- ECG data acquisition reduction and analysis, microcomputer based 2−43742
- EEG, statistical data analysis, computer managed 2−43744
- EEG period-peak anal. with microprocessor appls. 2−31707
- EEG signal analysis, appl. of model of N-pole with random processes 2−33168
- electrocardiographic rhythm analysis using Lorenz plot and microcomputer *(Japanese)* 2−28075
- electrocardiosignals, computerised processing *(Russian)* 2−24037
- emergency simulation by microcomputer and video disc 2−35802
- EMG, single-site microcomputer identification of temporal pattern differences, prosthesis and orthosis appl. 2−34113
- enzyme kinetics nonlinear regression curve fitting package for HP-85 microcomputer, ROSFIT program 2−28041
- epidemiological research, microcomputer data entry 2−28056
- foetal heart rate during labour, variability computation using microcomputer 2−39910
- health and medical information systems roundtable 2−23637
- health care, future developments of DP 2−31410
- health care, routine, in field settings 2−23627
- health care, surveillance and utilisation review systems, new design 2−23591
- health unit management system, comprehensive county system automation 2−23632
- heart, image meas. and anal. 2−39929
- heart rate and physical activity in outpatients, new system for long-term recording and processing 2−28039
- HELP-based decision analysis applied to coronary artery disease 2−31404
- hierarchical multicomputer system for medical care 2−35843
- hospital information system, graphical display of clinical and laboratory data using desktop computer 2−23640
- hospital information system support for the medical decision maker 2−23615
- hospital information systems, development and evaluation 2−23582
- hospital information systems, evaluating system impacts 2−23613
- hospital information systems, Massachusetts experience 2−23624
- hospital information systems, related problems 2−23614
- hospital information systems, resource management view 2−23616
- hospital management, new construct, case for case mix 2−23623
- hospital systems, relational database systems for management and anal. of medical data 2−23620
- human lung, simulation of ternary diffusion in distal airways 2−43765
- hypertension clinic appl., BP microcomputer program 2−31405
- hypertension management: the role of the computer in improving patient compliance 2−35499
- image analysis, algorithms for morphological features extraction 2−28085
- image processing, TAL software system for LEYTAS 2−35155
- image understanding system, identification of artery branches in cineangiograms 2−39942
- images, anal. automation 2−28063
- immunoassays and bioassays, computer program for anal. 2−43755
- implantable medication system, operation and appls. 2−35842
- informatics challenge, delusions or new perspectives 2−35500
- information system, understanding employee reactions 2−23612
- laboratory data management system for PDP11 2−27611
- laryngeal surgery, perturbation anal. use for objective assessment 2−24071
- left ventricle reconstruction, network flow approach from two projections 2−24020
- left ventricular boundary automated extraction from ^{99m}Tc gated blood pool scintigrams 2−28087
- left ventricular epicardial surface for quantification of jeopardised myocardium 2−31705
- MARI computerised information system functions 2−23644
- master hearing aid, computer program for fitting aid to residual hearing characteristics of individual patients 2−43768
- MATCHER, PL/I program to create and analyze mathed sets 2−31406

medical computing continued
- maximum likelihood paired comparison rankings 2−24011
- medical informatics role in establishing integrated and intelligent medical information system 2−35498
- mental health, computer assisted program for treatment of depressive disorders 2−43741
- microelectronics and computer appls. in medicine *(German)* 2−35809
- microelectronics and computers, appls. in medicine 2−35823
- mortality data, NCHS, storage and retrieval systems 2−23634
- multi-unit nerve impulses, softwave system for real-time discrimination 2−31708
- multiple hypothesis tests program 2−28038
- multiple lead exercise ECGs in real time, processing program 2−31706
- multisample clinical instruments, pattern language for data points identification, program design 2−24073
- navy medical department information system 2−23631
- nerve fibre velocity spectrum estimation by computer 2−24067
- nerve tonic activity of vagus and depressor nerves, component analysis of electrograms by computer 2−31713
- nuclear medicine, data acquisition and processing unit *(French)* 2−28062
- nuclear submarine microcomputer-based medical information system implementation, user training 2−23625
- nursing, quality assurance research and program development 2−24063
- nursing, vendor use in development of new computer system 2−24064
- nursing practice documentation using computerised medical information system 2−23602
- occupational health information system, FLOW GEMINI 2−23638
- occupational health information systems, introduction 2−23636
- occupational health professionals, TOHMS system 2−23639
- online database price analysis 2−43640
- operating system requirements and user interfaces 2−39923
- oximeter, IL-182 CO, calculator/computer-assisted calibration and use 2−24026
- pacemaker checking, appl. of technique for linking records chronologically and exploitation of resultant data file *(French)* 2−28057
- parallel line assays results eval., anal. of variance program 2−29375
- patient care, quality assurance future 2−23589
- patient monitoring, microcomputer based system, research oriented, data logging 2−35824
- patient origin-destination patterns display in space and time, FLOWMAP interactive graphic mapping program 2−24066
- peak detection algorithm of biological signals 2−43749
- petit mal epilepsy seizure, microcomputer based detection and quantification 2−39911
- pharmacokinetic modelling, DRUGMODEL program 2−24056
- pharmacokinetic parameter determination from measured serum drug concentrations using calculator, two point curve fitting method 2−43764
- pharmacokinetic systems, dynamic simulation using SPICE2 electrical circuit analysis program 2−43758
- pharmacokinetics, minicomputer program for estimation of first-order absorption rate in a one-compartment model by the Wagner-Nelson method 2−24006
- Phase II clinical trial design program using predictive probability 2−35804
- physiological systems data file structure, FILELB 2−24018
- Picture Processing Language for PICAP system 2−35156
- plotted to tabular data conversion program in FORTRAN 2−43763
- populations classification with unequal covariances allowance 2−24013
- primary care, PROMIS, computerised problem-oriented medical information system demonstration 2−23605
- problem solving system, CAMPS 2−24061
- psychology, computer appls. conf. Philadelphia, PA, USA, 1981 2−44118
- radiation therapy, computer appl., conf., Kawasaki and Tokyo, Japan (Sept. 1980) 2−39967
- radiation therapy, research-oriented treatment planning program system 2−24017
- radioisotope images, automatic method for alignment 2−24047
- radioisotope imaging, edge detection algorithm, performance evaluation 2−39935
- radionuclide angiocardiographic approaches to shunt assessment, simulation-based sensitivity study 2−31700
- radiotherapy dosimetry, review system for cooperative group research 2−28064
- radiotherapy planning, limitations of 2D programs 2−35817
- renal retention functions calculation, improved deconvolution technique 2−28042
- sexually transmissible disease morbidity tracking, database system 2−23635
- sexually transmitted disease clinic, OpScan-MIMS automated medical information management system 2−23633
- small computer systems for medico-biological DP *(Russian)* 2−24036
- software development for small computer system, application of structured tools and techniques 2−23301
- SPHINX medical decision making system *(French)* 2−35819
- spirogram analysis for quiet breathing 2−39912
- spontaneous breathing, linear modelling of ventilatory mechanics 2−31701
- statistical analysis of medical data *(German)* 2−43761
- stereotaxic surgery, computer assisted, CASS program 2−24072
- surface measurement by space-encoded projected beam systems 2−24286
- system timing constraints, experience with graphic data entry 2−22765
- systems technology effects in medical fields *(Japanese)* 2−35503
- theophylline therapy, oral and intravenous 2−28040
- TLDs, ^{6}LiF, estimation of zero dose reading build up due to neutron prod . ^{3}He, computer programme 2−27959
- toxic health hazard measurement system, Apple based 2−24041
- UK general medical practice, computer desirability and potential benefits 2−39970
- UK National Health Service computer policy and software support problems 2−39969
- US arteriography, new technique for carotid bifurcation imaging 2−31737
- US FDA regulation requirements 2−43745
- USA National Institute of Mental Health data base 2−23878
- vascular flow of eye fundus, fluorometry and differential, luminosity integration as perfusion time function, angiographic photographs appl. 2−24068
- ventricular function meas., data processing 2−39928
- visual evoked potential, automatic detect., meas., and documentation: microprocessor appl. 2−24022
- warfarin maintenance dose prediction, TI 59 calculator program 2−39917
- whole-body computer images reconstruction from scanning gamma camera 2−31703
